konamakhila@gmail.com

Experienced frontend engineer specializing in UI/UX design and development. Proficient in leading end-to-end projects, writing modularized code, optimizing performance and delivering user-centric web applications.

EMPLOYMENT

Computer Scientist-2 | **Adobe Inc.** | **Oct 2024 - Present**

Adobe Learning Manager

- Led frontend architecture and delivery of a learner analytics dashboard, enabling real-time visibility into learner progress and improving course completion rates by ~30%.
- Owned and scaled AI-driven frontend systems (chatbot, AI search, split-pane UI), building reusable component patterns that reduced future feature development effort by ~25% and enabled rapid iteration of AI experiences.
- Drove adoption of unit testing frameworks across React, Vue, and Ember ecosystems

SDE3, Frontend | **Teachmint Technologies** | **Nov 2020 – Oct 2024**

Teachmint's Integrated School Platform

- Lead a team of 3 engineers to develop end-to-end modules for the learning management system, including classroom management, student attendance and study materials used by teachers.
- Developed efficient dynamic forms to store student's information.
- Built a user facing portal from scratch to apply for an admission for a school and track its status.
- Collaborated with UX designers to standardize the CSS and behavior of React components used across the product as per the design system and documented it using Storybook ensuring consistency.

Teachstack, Teachmint's video conferencing as a service

- Lead a cross-platform team of 3 engineers to develop features like student polls and hand raising.
- Integrated YouTube's streaming APIs to broadcast the teacher's ongoing live class on their YouTube channel.
- Re-architected the web platform to migrate from a third-party media server to an in-house built media server, improving modularity, scalability and performance of the product.

Teachmint Web Application

- Implemented a client-side Event SDK tool to send logs, messages and errors to a central server.
- Integrated firebase cloud messaging APIs to send push notifications to users.

Software Developer | **Rapidd Technologies** | **July 2018 - Nov 2020**

Project: Zatopek OFE

- App Development using UI5, JavaScript, jQuery and MVC frameworks on SAP Web IDE.
- Integrated the frontend app with the backend services using JSON models.

EDUCATION

Warangal, India | **National Institute of Technology (NIT), Warangal** | **2014-2018**

- B.Tech. in Computer Science and Engineering.
- Relevant Coursework: Operating Systems, Databases, Algorithms, Programming Languages, Computer Architecture, Theory of Computation.

TECHNICAL SKILLS

React, Redux, Typescript, JavaScript, Ember, Vue, REST, Google OAuth2, Firebase, jQuery, CSS3, SQL, C++
